

Nearly everyone has or will suffer a **Blue Screen of Death** at one time or another, so it's best to be prepared.

Right click **Computer** and select **Properties**, then **Advanced system settings**.

The window below will open.

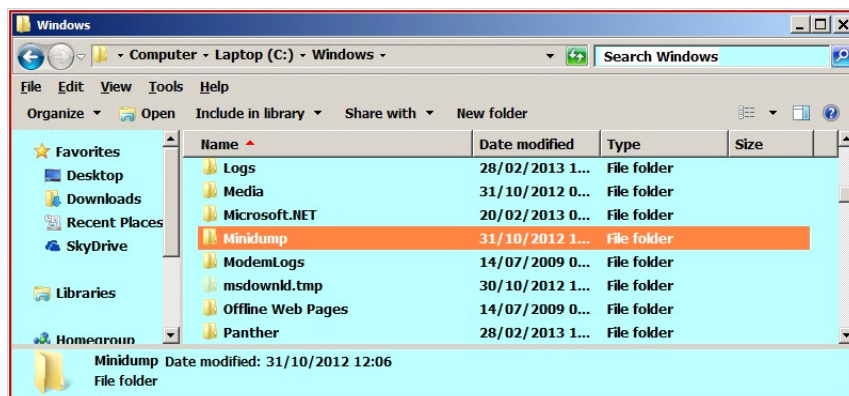

Click as highlighted above.

Set as above and click OK.

Now, go to **(C:) - Windows**, click **New folder** and name it **Minidump**

All you need now is something or someone that can read it, this is what I prefer:-
